Cloud Backup for Schools

Wildwater Cloud Backup for Schools offers a fully automated online backup and recovery service, which simplifies the management of backups, alleviating the risks and responsibilities of working with tape drives or USB drives.

Wildwater can supply this fully managed solution so that the school has the assurance of a secure and complete offsite backup, ready for restoration in any emergency. This service has been designed specifically for schools and includes a SIMS backup service.

Benefits of using Wildwater Cloud Backup for Schools include:

- No capital outlay for storage and backup equipment
- No maintenance costs
- Data is encrypted and is stored off site in high security data centres
- No tapes or tape management issues
- Maximum data availability and data security
- No need to acquire and maintain specific storage technical knowledge
- Consistent regular data backups
- Safeguards the confidentiality of school data through strong encryption
- Rapid data recovery
- Ability to prove restores

All managed by Wildwater, alleviating any intervention from school staff.

Pricing

Pricing is based on the amount of storage required so varies from one school to the next. The figures below give an indication of prices.

Admin Bundle (Admin Server with SIMS)	Curriculum Bundle (Curriculum Server)
From 10GB – 100GB Storage £75 - £165 per year	From 50GB – 1TB Storage £120 - £1,000 per year
